KSM

Kaisai Service Module

Remote Service Monitoring Module

Support for all Kaisai
heat pump models

KHA | KHC | KHX | KHY

The Kaisai Remote Service Monitoring for heat pumps consists of a KSM module connected to the heat pump and software on a server and enables remote supervision of the unit with monitoring of its operation and quick service response in the event of a fault.

The KSM provides the ability to remotely adjust the heat pump's operating parameters and the sense of security that comes from having constant control over its operation.

remote monitoring
of the heat pump
